

Application No. 09/359,809
Supplemental Amendment dated June 15, 2004
Response to May 14, 2004 Office communication

Amendments to the claims:

The listing of claims will replace all prior versions and listings of claims in the application.

Listing of Claims:

Claims 1-72 (canceled without prejudice of disclaimer)

Claim 73 (currently amended): A process for manufacturing a lubricant composition comprising forming a dispersion comprising a superabsorbent polymer that absorbs more than about 100 times its weight in water, said dispersion further comprising and a material for decreasing friction, ~~wherein said superabsorbent polymer absorbs more than about 100 times its weight in water.~~

Claim 74 (currently amended): A lubricant composition of matter comprising a product produced by the process of forming a dispersion comprising a superabsorbent polymer that absorbs more than about 100 times its weight in water, said dispersion further comprising and a material for decreasing friction, ~~wherein said superabsorbent polymer absorbs more than about 100 times its weight in water.~~

Application No. 09/359,809
Supplemental Amendment dated June 15, 2004
Response to May 14, 2004 Office communication

Claim 75 (previously presented): The lubricant composition of claim 74 wherein said material for decreasing friction comprises a petroleum oil lubricant or grease thereof, and wherein said composition optionally comprises a lubricant additive.

Claim 76 (currently amended): A lubricant composition of matter comprising a product produced by the process of forming a mixture comprising a superabsorbent polymer, said mixture further comprising and a material for decreasing friction, wherein said superabsorbent polymer absorbs more than about 100 times its weight in water and wherein said material for decreasing friction comprises a solid lubricant comprising an inorganic compound, carbon or metal that provides barrier-layer lubrication, or mixtures thereof, and wherein said composition optionally comprises a lubricant additive.

Claim 77 (previously presented): The lubricant composition of claim 76, wherein said solid lubricant comprises, molybdenum disulfide, cobalt chloride, antimony oxide, niobium selenide, tungsten disulfide, mica, boron nitride, silver sulfate, cadmium chloride, cadmium iodide, cadmium oxide, borax, basic white lead, lead carbonate, lead monoxide, lead iodide, asbestos, talc, zinc oxide, carbon, graphite, babbitt, bronze, brass, aluminum, gallium, indium, thallium, thorium, copper, silver, gold, mercury, lead, tin, indium, or the Group VIII noble metals or mixtures thereof.

Supplemental Amendment dated June 15, 2004
Response to May 14, 2004 Office communication

Claim 78 (previously presented): The lubricant composition of claim 74 wherein said material for decreasing friction comprises a solid organic lubricant, and wherein said composition optionally comprises a lubricant additive.

Claim 79 (previously presented): The lubricant composition of claim 78, wherein said solid organic lubricant comprises a fluoroalkylene homopolymer or copolymer, a lower alkylene polyolefin homopolymer or co-polymer, a paraffinic hydrocarbon wax, phenanthrene, copper phthalocyanine, or mixtures thereof.

Claim 80 (currently amended): A lubricant composition of matter comprising a product produced by the process of forming a mixture comprising a superabsorbent polymer, said mixture further comprising and a material for decreasing friction, wherein said superabsorbent polymer absorbs more than about 100 times its weight in water, and wherein said material for decreasing friction comprises water containing a lubricant additive.

Claim 81 (currently amended): A lubricant composition of matter comprising a product produced by the process of forming a mixture comprising a superabsorbent polymer, said mixture further comprising and a material for decreasing friction, wherein said superabsorbent polymer absorbs more than about 100 times its weight in water, and wherein said material for decreasing friction comprises an oil or greases thereof and water, and wherein said composition optionally comprises a lubricant additive.

Supplemental Amendment dated June 15, 2004
Response to May 14, 2004 Office communication

Claim 82 (currently amended): A lubricant composition of matter comprising a product produced by the process of forming a mixture comprising a superabsorbent polymer, said mixture further comprising and a material for decreasing friction, wherein said superabsorbent polymer absorbs more than about 100 times its weight in water, wherein said material for decreasing friction comprises a solid lubricant and water, and wherein said composition optionally comprises a lubricant additive.

Claim 83 (previously presented): The lubricant composition of claim 82, wherein said solid lubricant comprises molybdenum disulfide, cobalt chloride, antimony oxide, niobium selenide, tungsten disulfide, mica, boron nitride, silver sulfate, cadmium chloride, cadmium iodide, cadmium oxide, borax, basic white lead, lead carbonate, lead monoxide, lead iodide, asbestos, talc, zinc oxide, carbon, graphite, babbitt, bronze, brass, aluminum, gallium, indium, thallium, thorium, copper, silver, gold, mercury, lead, tin, indium, the Group VIII noble metals, a fluoroalkylene homopolymer or copolymer, a lower alkylene polyolefin homopolymer or co-polymer, a paraffinic hydrocarbon wax, phenanthrene, copper phthalocyanine, or mixtures thereof.

Claim 84 (currently amended): A lubricant composition of matter comprising a product produced by the process of forming a mixture comprising a superabsorbent polymer, said mixture further comprising and a material for decreasing friction, wherein said superabsorbent polymer absorbs more than about 100 times its weight in water, wherein said material for

Response to May 14, 2004 Office communication

decreasing friction comprises a phosphate, and wherein said composition optionally comprises a lubricant additive.

Claim 85 (previously presented): The lubricant composition of claim 84, wherein said material for decreasing friction comprises tricresyl phosphate, zinc phosphate, iron phosphate or manganese phosphate, or mixtures thereof.

Claim 86 (previously presented): The lubricant composition of claim 74 wherein said material for decreasing friction comprises a fatty oil, fatty acid, or wax, or mixtures thereof, and wherein said composition optionally comprises a lubricant additive.

Claim 87 (previously presented): The lubricant composition of claim 74 wherein said material for decreasing friction comprises a synthetic oil lubricant, or grease thereof, and wherein said composition optionally comprises a lubricant additive.

Claim 88 (previously presented): The lubricant composition of claim 74 wherein said material for decreasing friction comprises a soap, and wherein said composition optionally comprises a lubricant additive.

Claim 89 (previously presented): The composition of any one of claims 73-79, and 84-88 wherein said composition is substantially anhydrous.

Application No. 09/359,809
Supplemental Amendment dated June 15, 2004
Response to May 14, 2004 Office communication

Claim 90 (previously presented): The composition of any one of claims 73-88 wherein said superabsorbent polymer comprises a polymer of acrylic acid, an acrylic ester, acrylonitrile, acrylamide, co-polymers thereof or mixtures thereof.

Claim 91 (previously presented): The composition of any one of claims 75-88 wherein said lubricant additive comprises an antioxidant, rust inhibitor, antiwear compound, extreme pressure additive, detergent, dispersant, pour point depressant, viscosity-index improver, or foam inhibitor, or mixtures thereof.
